LIBRARY SERVICES

This Laboratory maintains a small library specializing in fishery literature to provide the scientific staff with a readily available source of the more commonly used reference works.

More specialized and less frequently used items are borrowed from university and institutional libraries

At the present time, the library contains approximately 500 books and 500 serial publications, the latter consisting of about 7,500 items.

The library is open to the public and is used occasionally by the other scientific institutions in Woods Hole.
